Trident Technical College
North Charleston, SC
Criminal Justice, 37 credits
(2008–2011)

OTHER SKILLS

Microsoft Office suite
Adobe Creative Cloud suite
65 WPM typing speed
Hardware installation
Customer service

PROFESSIONAL PROFILE

I'm a junior developer with a passion for computers, coding and solving logic problems. I started with QBasic and video game modding in my youth, worked a bit with VisualBasic and have since started using JavaScript to develop web apps and games.

NOTABLE PROJECTS

TASKMASTER / COLLABORATIVE FULL STACK PROJECT MAR 2017 – PRESENT

- TaskMaster is a mobile-first, everyday app that allows users to quickly create to-do lists and share them with others.
- My responsibilities include project management through Trello, maintenance of Flux unidirectional data flow, the creation and rendering of multiple views and general styling.
- Tech stack includes Sass, Backbone.js, React.js, .NET Core, and IdentityServer.

BBC RADIO PLAYLISTS / FRONT END SINGLE-PAGE MULTI-VIEW FEB 2017

- Fetches API-based playlist data for BBC Radios 1 and 2, serving the data as separate views changed by route with no need for refreshing.
- Primarily Backbone.js based with MVC architecture implementation, grid system for styling adapted from Bootstrap.
